SUMMARY

Final-year B.Tech CSE (Data Science) student (2027) who builds end-to-end data projects with **SQL and Python**: cleaning 1M+ raw records, writing window-function SQL, building KPI dashboards and ML models with measurable results. Seeking Data/Business Analyst, QA or IT internships and entry-level roles (Hyderabad, Bangalore, Chennai, remote).

TECHNICAL SKILLS

- **Languages:** Python, SQL, C, JavaScript (Basics)
- **Data & ML:** pandas, NumPy, scikit-learn, Matplotlib, Seaborn, Exploratory Data Analysis
- **BI & Tools:** Power BI, Excel, Jupyter Notebook, Git, GitHub
- **Web & Databases:** HTML, CSS, React.js (Basics), Flask, MongoDB, SQLite
- **Core Concepts:** Data Structures, Machine Learning, Data Analysis

PROJECTS

Retail Sales Analytics | *SQL, SQLite, Python, Plotly* GitHub | Live Dashboard

- Cleaned **1.07M** raw retail transactions (duplicates, cancellations, non-product codes) into a 5-table SQLite database.
- Wrote **12 SQL analyses** (CTEs, LAG, NTILE) for KPIs, MoM growth, RFM segments and cohort retention; found the top 20% of customers drive **77% of £19.4M** revenue and flagged **829 at-risk customers worth £1.5M**.
- Built a Power BI-style dashboard with KPI cards and year/market slicers, published on GitHub Pages.

Customer Churn Prediction | *Python, scikit-learn, Flask, JavaScript* GitHub | Live Demo

- Compared 4 models with 5-fold CV on 7,043 customers; chose balanced logistic regression with **ROC-AUC 0.84**, catching **78% of churners**.
- Showed a top-20% risk call list reaches **50% of churners at a 66% hit rate** (vs 26.5% at random); main drivers: month-to-month contract, short tenure.
- Served the model through a Flask REST API with 5 pytest tests and an in-browser demo.

AP Rainfall & Crop Production EDA | *Python, pandas, Seaborn, SciPy* GitHub | Report

- Analysed 117 years of IMD rainfall and 9,500 district crop records for Andhra Pradesh; fixed 61 double-counted rows.
- Showed rain-fed groundnut yield tracks monsoon rain (**r = 0.77**) while canal-irrigated rice shows no link; Guntur produces **58% of AP's chillies**.

Safe Roads (Team Project) | *Python, Flask, MongoDB, React.js, YOLOv8, Leaflet* GitHub

- Pothole detection from road photos with a YOLOv8 segmentation model (**validation mAP@50 0.68**), using GPS from photo EXIF data.
- Hazard-aware navigation: OSRM routes with a 30 m buffer so drivers see only potholes on their route; REST APIs with JWT login.

Stalytex | *React.js, TypeScript, Recharts, SheetJS, sql.js* GitHub

- Browser-based analytics tool: upload CSV/Excel, edit and filter data, view column statistics, build 6 chart types, run SQL queries and export to CSV/XLSX/PNG.

EDUCATION

R.V.R. & J.C. College of Engineering, Guntur Sep 2023 – Jun 2027
B.Tech in Computer Science and Engineering (Data Science) CGPA: 7.94/10

Sri Chaitanya Junior College | Intermediate (MPC): 79.5% Jun 2021 – Apr 2022

Sri Chaitanya School | SSC: 100% Jun 2020 – Apr 2021

CERTIFICATIONS

- Certified Data Science Professional – Oracle
- Certified Gen AI Professional – Oracle
- AICTE Google AI-ML Virtual Internship – EduSkills
- AICTE Microsoft Foundations of AI Virtual Internship – Edunet Foundation
